CAREER OBJECTIVE

Aspiring Software Engineer with a strong foundation in both hardware and software development. Passionate about exploring new technologies, I strive to apply my expertise in software development and hardware integration to drive innovation and create impactful solutions.

EDUCATION

B.E in Electronics and Communication Engineering, <i>Anna University Regional Campus, Coimbatore</i>	2021 – Present 7.9 CGPA
Bharathi Matriculation Hr,Sec School, High School	2021
Shri Nehru Vidyalaya Matriculation Hr.Sec School, SSLC	2019

INTERNSHIP

Embuzz Technologies private limited, Coimbatore Worked on AVR ATMEGA16 microcontroller. Programmed with Embedded C to control the input/output pins	Jul 2024 – Aug 2024
nT-nTech Solutions Pvt.Ltd, Coimbatore Worked on a smart tv lift project using PCB on the domain of IoT. Took the role of schematic designer for the PCB and did PCB soldering as well.	Jul 2023

PROJECTS

Wildlife Protection using IoT
RFID tags track animal movement, with data sent to a user interface for real-time monitoring and threat detection, aiding wildlife conservation.

Electronic Voting Machine using Xilinx
A secure voting system designed using Xilinx FPGA, ensuring fast, reliable, and tamper-proof vote recording with a user-friendly interface for real-time result processing.

Media Streaming using IBM Cloud video streaming – Cloud Computing (Naan Mudhalvan)
A cloud-based system for seamless media streaming, enabling real-time content delivery with high availability, scalability, and minimal latency.

CERTIFICATES

Analog Circuit Design Using Discrete Components
Workshop conducted by the department of ECE in AURCC.

Indo-Norway Workshop
Conducted by IIT Palakkad on the topic “Sensing, communication and Control system for industrial Automation Application.”

SKILLS

C Programing	Python
ui/ux design	Web Development [Front End]
